

## Indexes - 4 ☆

Points: 61 Rank: 17232

Problem

Submissions

The correct syntax for creating composite indexes in MS SQL Sever is:

CREATE INDEX index\_name  
ON  
table\_name(column1, table\_name(column2));

CREATE INDEX index\_name  
ON  
table\_name(column1) and table\_name(column2);

CREATE INDEX index\_name  
ON  
table\_name(column1, column2);

All the above-mentioned syntax are correct.
